### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Foster.

3. The patent to Foster shows a fishing tool having shaft, a handle end with a grip 80, several base arms (not labeled but part of U-shaped handle 62) provided thereon and being spaced from a corresponding strap cleat 52, 52 on the shaft whereby a container having a base supported on the base arm may be secured to the shaft by a strap extending through the strap cleat. Foster shows a plurality of different tips in Figs. 4, 5, and 9. In reference to claim 1, Foster shows hooks (not labeled) attached to a base arm as shown in figs. 7 and 8. The hooks are directly through the elongate body 36 from handle 62 (on the bottom) and are probably the attachment means for the handle. They show structure capable of acting as a hook and are integrally attached to the shaft 36. In reference to claim 6, Foster shows the tool may be used for measuring purposes noting Fig. 7.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foster.

The patent to Foster shows a fishing tool as discussed above. In reference to claims 7-8, Foster does not disclose the size of the tool being three to five feet tall and having a circumference of about 2 inches, but it would have been obvious to employ a tool of the recited sizes since the exact size would be determined through routine experimentation. Also, see *In re Rose*, 105 USPQ 137.

3. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foster as applied to claim 1 above, and further in view of Wesson.

The patent to Foster shows a fishing tool as discussed above and shows a plurality of tips such as a gaff tip, a pick tip, a base tip, but does not show the tip having an interior pocket to receive the tip end of the shaft therein. Foster shows a threaded tip 46 being received in to the threaded 44 interior of the shaft in Figs. 3-4. The patent to Wesson shows a fishing tool having a plurality of tips in Figs. 4, 7-12, each that have an interior pocket such as 48 in fig. 4 adapted to receive the tip end 32-33 of the shaft. In

Art Unit: 3643

reference to claims 2-5, it would have been obvious to provide Foster with tips having interior pockets as shown by Wesson since merely one tip and tip end structure is being substituted for another and no stated problem is solved. The function is also the same.

***Allowable Subject Matter***

4. Claims 9-20 are allowed.

***Response to Arguments***

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3643

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
